This book tackles the challenging topic of corruption. It explores the evolution of a global prohibition regime against corrupt activity (the global anti-corruption regime). It analyses the structure of the transnational legal framework against corruption, evaluating the impact of global anti-corruption efforts at a national level. The book focuses on the United Nations Convention against Corruption (UNCAC) as the primary tool of the global anti-corruption regime. It provides new and engaging material gathered in the field, including first-hand accounts from actors at international, regional, and domestic levels. By documenting the experiences of diverse actors, the book makes a substantial contribution to literature on corruption and anti-corruption efforts. Synthesising empirical research with an exploration of theoretical literature on corruption and regime evolution results in novel suggestions for improvement of the global anti-corruption regime and its legal tools.

The *Global Anti-Corruption Regime* is a well-rounded text with a wealth of new information that will be valuable to both academic and policy audiences. It clarifies the factors that prevent current anti-corruption efforts from successfully eliminating corrupt activity and applies the five-stage model of global prohibition regime evolution to the global anti-corruption regime. It will be of interest to researchers, academics, policymakers, and students interested in anti-corruption law, comparative law, transnational criminal law, international law, international relations, politics, economics, and trade.

Dr Hannah Harris is a legal academic, freelance data scientist and Research Fellow at the Centre for Law Markets and Regulation, University of New South Wales. Her research area is transnational law and the implementation and enforcement of regulatory regimes, focusing on financial crime, bribery, and corruption.
